

ANDREW CYBOSSKY

Senior UX/UI Designer

Shannon, Co. Clare, Ireland | 00353 85-1527271 | andrew.cybossky@gmail.com

Open to Dublin (Hybrid) & Relocation | [Portfolio](#) | [LinkedIn](#)

PROFILE

Senior UX/UI Designer with 7+ years of experience delivering complex, end-to-end digital products from discovery and user research to wireframes, interactive prototypes, and scalable design systems. Proven track record collaborating within multidisciplinary agile teams alongside product managers, engineers, data scientists, and business stakeholders to translate insights into impactful human-centred experiences. Delivered UX and front-end solutions across 350+ commercial projects in hospitality and booking technology, focusing on usability, WCAG accessibility, and business outcomes. Passionate about applying Generative AI and emerging technologies to simplify complex user workflows.

CORE SKILLS

- UX/UI Design & Research: Human-Centred Design (HCD), User Research & Synthesis, Usability Testing, Information Architecture, Wireframing, Rapid Prototyping, Design Systems, Accessibility (WCAG), Workshop Facilitation & Design Critique.
- Tools & Software: Figma, Axure RP, Adobe Creative Cloud (Photoshop, Illustrator, InDesign, Premiere Pro), Miro.
- Front-End & Technical Collaboration: HTML5, CSS/SCSS, JavaScript ES6+, Responsive Design, API Integration, Developer Handoff.
- Methodologies: Agile/Scrum, Cross-Functional Collaboration, Stakeholder Management, Service Design Fundamentals.
- Languages: English (fluent), Russian (native), Lithuanian (native)

EXPERIENCE

- Customisation Specialist (UX-focused role)** — *Access Group*

2024 — Present

 - Own the end-to-end UX customisation of enterprise booking interfaces, translating business and client requirements into responsive, WCAG-accessible digital solutions.
 - Facilitate stakeholder alignment early in the design cycle, conducting design reviews and incorporating feedback to ensure brand consistency and reduce rework.
 - Conduct usability testing and performance optimizations across booking flows to resolve UI/UX friction points.
 - Maintain customisation and design documentation so patterns are reusable across future client implementations.
- UX/UI Designer & Front-End Developer** — *SHR Group*

Jun 2023 — Jun 2024

 - Designed end-to-end user-centred interfaces for web and mobile products, driving the lifecycle from initial discovery and wireframing to high-fidelity, developer-ready Figma components.
 - Conducted user research and usability testing sessions, translating findings into iterative design enhancements before product release.
 - Partnered closely with engineering teams to integrate front-end UI with backend APIs, ensuring technical feasibility and design fidelity.
 - Scaled and maintained company-wide design systems, ensuring consistency and seamless user flows across expanding feature sets.
- Web Designer / UX/UI Designer** — *Revmac Ltd* — *Online Hotel Reservation Systems*

Jun 2019 — Jun 2023

- Led discovery-to-delivery product design for web and mobile reservation engines deployed across 350+ commercial implementations.
- Synthesised user insights to build interactive prototypes and information architectures, validating concepts through testing prior to engineering handoff.
- Built, scaled, and governed the company's central design system, providing a consistent UI foundation for cross-functional teams.
- Collaborated directly with client stakeholders and cross-functional teams to iterate on designs and drive measurable engagement.

Web Designer Intern — *Revmac Ltd*

- Designed and implemented websites using the Avvio CMS (PHP, HTML, CSS) — first hands-on introduction to shipping real client work.

SELECTED PROJECTS

Ligula Booking Engine — **Ligula Hospitality Group AB**

- Led front-end customisation of the booking engine (JavaScript, HTML5, CSS3), improving the interface and booking flow.
- Designed responsive layouts and interactive navigation to give a consistent experience across devices, working within the platform's technical and security constraints.

Gothia Towers — **Digital Booking Redesign**

- Redesigned the digital booking engine to improve engagement and direct-channel revenue.
- Worked with stakeholders to identify pain points in the legacy reservation system and designed a personalised journey that handled complex group bookings and multi-room packages.
- Managed design delivery end-to-end, from concept through QA and release.

EDUCATION

Diploma in Full Stack Software Development — Code Institute, Dublin

Mar 2020 — Mar 2021. End-to-end web development: front-end interfaces, back-end logic, databases (HTML5, CSS3, JavaScript ES6+, React, Node.js, Python, SQL/NoSQL, RESTful APIs).

BSc, Multimedia Programming & Design (Information Technology) — TUS (formerly Limerick Institute of Technology)

Sep 2014 — Jun 2018. Combined software development with digital media and UX/UI design principles; graphic design, animation and database-driven web applications.

AWARDS & CERTIFICATIONS

- Full Stack Software Development Certification — Code Institute
- Smarter Travel Student Awards — university team project on sustainable campus transport; led user research and presented prototypes and findings to an industry panel
