SUMMARY

Professional Summary: Andrew Cybossky is a highly accomplished UX/UI Designer and Frontend Developer with over 5 years of experience delivering innovative, user-centered digital solutions across diverse industries. With a proven track record of working on more than 350 commercial projects, Andrew combines technical expertise in frontend development with a deep understanding of user experience (UX) and user interface (UI) design principles to drive product impact. His qualifications include a Full Stack Software Development certification from Code Institute and a degree in Multimedia Programming & Design from TUS, equipping him with a strong foundation in both design and development. Andrew's technical skill set includes HTML, CSS/SCSS, Javascript, Figma, Axure, Adobe Creative Cloud (Photoshop, Illustrator, InDesign), WordPress, and mobile applications. He excels in creating responsive designs, wireframes, prototypes, and high-fidelity interfaces that prioritize usability, accessibility, and performance to improve effectiveness. His experience spans customizing hotel booking engines, designing user-centric web and mobile interfaces, and conducting user research and usability testing to refine designs. Currently, as a Customisation Specialist at Access Group, Andrew customizes hotel booking engine UIs using HTML, CSS, and JavaScript, ensuring seamless user experiences and optimal performance. Previously, as a UX/UI Designer and Frontend Developer at SHR Group, he designed and developed intuitive interfaces, integrated UI with backend APIs, and maintained design systems. His earlier role at Revmac Ltd as a Web Designer and UX/UI Designer further honed his skills in creating visually appealing, responsive designs and translating user needs into effective solutions. Andrew is fluent in English, Russian, and Lithuanian, bringing a multicultural perspective to his work. His passion for art, design, and continuous learning, combined with his technical expertise, makes him an ambitious contributor to any UX/UI design team. Andrew is now seeking a UX/UI Designer role where he can leverage his skills in user research, wireframing, prototyping, and frontend development to create engaging and impactful digital experiences.

Integration

· Cross-Functional Collaboration

Andrew's portfolio, available at <https://andrewskyboss.github.io/cv/portfolio.html>, showcases his ability to deliver high-quality, user-focused designs that align with business goals. He is eager to bring his creativity, technical expertise, and passion for design to a dynamic UX/UI team.

EXPERIENCE

Customisation specialist

Access Group (UK company)

Present

Limerick, Ireland

- Customize hotel booking engine UIs with HTML, CSS, JavaScript.
- Implement responsive designs for seamless UX that is intuitive and effective.
- Integrate custom features and functionalities.
- Optimize booking engine performance and accessibility to maximize product impact and business value.
- Troubleshoot and debug front-end issues.
- Collaborate with teams to ensure accurate implementation.
- Maintain and update customization documentation.
- Apply client-specific branding and design guidelines, aligning stakeholders early to reduce ambiguity and accelerate selection process alignment.

UX/UI designer / Frontend developer

SHR Group (USA company)

Jun '23 — Jun '24

Limerick, Ireland

- Design & develop user-centric web/mobile interfaces, clarifying edge cases to improve selection process outcomes and reduce ambiguity early.
- Create wireframes, prototypes, & high-fidelity designs that translate intent into actionable drafts for rapid alignment and effective delivery.

- Implement responsive UI components using HTML/CSS/JS.
- Conduct usability testing & iterate based on feedback to validate effectiveness and drive value creation.
- Integrate UI with backend APIs for dynamic functionality while partnering with engineers to influence implementation decisions that maximize business value.
- Optimize frontend performance for speed & accessibility, demonstrating tenacity in resolving complex issues to elevate product quality.
- Collaborate with designers & developers on projects, balancing ambition with reasoning to ship high-quality work at pace.
- Maintain design systems & coding standards with a strong commitment to consistency and long-term quality that supports effective engineering handoff.

Web designer / UX/UI designer

Jun '19 — Jun '23

Revmac Ltd (Online Reservation System for Hotels. Ireland)

Limerick, Ireland

- Design intuitive user interfaces for web and mobile, shaping product experiences that delight customers and improve effectiveness.
- Create wireframes and prototypes for user flows that clarify edge cases before development.
- Conduct user research and usability testing, screening insights to prioritize high-leverage improvements that create business value.
- Develop and maintain design systems that ensure effective, scalable delivery and support projects through release.
- Collaborate with developers for design implementation, aligning on receiving customer feedback for rapid iteration and improved selection process clarity.
- Create visually appealing website and app designs that communicate clear product value and support confident decision-making.
- Optimize designs for responsiveness and accessibility.
- Translate user needs into effective design solutions that demonstrate sound reasoning and initiative.

Web Designer intern

Limerick, Ireland

Revmac Ltd

- Create website design and implement it using Avvio CMS system (php, html and CSS coding).

EDUCATION

Diploma in Software Development in Full stack Software Development, Code Institute

Mar '20 — Mar '21

Dublin, Ireland

- Comprehensive training in end-to-end web development, covering frontend interfaces, backend logic, and database management. Key Tech: HTML5, CSS3, JavaScript (ES6+), React, Node.js, Python, SQL/NoSQL, and RESTful APIs.

Bachelor degree in Computer science in Multimedia Programming & Design (Information Technology), TUS - Technological University of the Shannon (Former Limerick Institute of Technology)

Sep '14 — Jun '18

Limerick, Ireland

- Developed a multidisciplinary skill set combining software development with digital media creation. Gained proficiency in frontend web development (HTML, CSS, JavaScript), UI/UX design principles, and object-oriented programming. Focused on creating interactive user experiences through a mix of graphic design, animation, and database-driven web applications.

PROJECTS

Ligula Booking Engine, Ligula Hospitality Group AB [Link](#)

- Lead the frontend customization of the Ligula booking engine, utilizing JavaScript, HTML5, and CSS3 to enhance the user interface and booking flow. Developed and implemented responsive layouts and interactive navigation elements to improve UX, ensuring a seamless cross-device user experience. Managed technical constraints and security protocols within the booking environment while delivering high-fidelity design updates that prioritized product effectiveness and clear business value.

Gothia Towers, Gothia Towers [Link](#)

• Project Consultant | Gothia Towers Digital Transformation

Redesigned and customized the digital booking engine for Gothia Towers to enhance user engagement and drive direct-channel revenue through intuitive, effective flows.

Collaborated with stakeholders to identify pain points in the legacy reservation system, applying first-principles reasoning to deliver a personalized user journey that accommodated complex group bookings and multi-room packages.

Managed the end-to-end deployment of customized features, maintaining commitment amid ambiguity and aligning influencers around value creation from draft concepts through QA and release.

AWARDS

Smarter Travel
Participant | Smarter Travel Student Awards (University Project)

Collaborated in a team environment to design and develop an innovative solution aimed at promoting sustainable transport and reducing carbon footprints on campus.

Conducted user research and data analysis to identify commuting barriers, resulting in a targeted proposal for [Name of your specific solution, e.g., a carpooling app/cycling initiative].

Presented findings and project prototypes to a panel of industry experts, focusing on feasibility, environmental impact, and user engagement.
